Notes

1. UK Indicators, to be produced on a quarterly basis by the South West RDA, is a compilation of regularly updated economic indicators outlining trends in the UK economy.

These indicators form part of a series of documents, comprising UK, Regional and Sub-regional Indicators.

Comments or questions regarding format or content are welcome and should be addressed to Allison.McCaig@southwestrda.org.uk.

2. Crown copyright material is reproduced with the permission of the Controller of HMSO and the Queen's Printer for Scotland.
3. The following abbreviations are used for the UK and its regions throughout the report:

E	Eastern
EM	East Midlands
ENG	England
GB	Great Britain
L	London
NE	North East
NI	Northern Ireland
NW	North West
SC	Scotland
SE	South East
SW	South West
WAL	Wales
WM	West Midland
UK	United Kingdom
Y&H	Yorkshire and the Humber

Headline Changes

Gross Domestic Product (GDP) and Gross Value Added (GVA) – Tables 1-3

- Annual real GDP growth slowed slightly in 2008 Q1 to 2.5%, down from 3% the same time in the previous year. In the same period, investment growth fell sharply to 1.1%, down from 9.3% the year before. Household expenditure remained resilient.
- Agriculture and Construction recorded solid output growth in early 2008 relative to the performance exhibited in the previous year, contrary to reports in the media suggesting the opposite for the latter. Agricultural annual output grew by 1% in 2008 Q1 having recorded negative growth throughout 2007, whilst construction output grew by 2.4%. The service sector showed signs of weakening with output growing by 1.4% less than the figure a year previously.

Inflation, Interest and Exchange Rates – Tables 7-9

- The Consumer Price Index stood at 3.3% at the beginning of July, which prompted the Governor of the Bank of England to write a letter to the Chancellor of the Exchequer. In 2008 Q1, input and output price levels had accelerated from levels a year previously and stood at 6.1% and 19.8% respectively.
- In the first half of 2008, the Sterling exchange rate started to weaken against the Euro, falling to 1.2615 which is the lowest it has reached since the latter currency's inception. The pound also depreciated against the dollar in the same period after exceeding the two dollar mark at the end of 2007.

Retail Sales, Household Consumption Expenditure & Disposable Income - Tables 10 - 12

- Retail sales increased by 5.4% between the first quarters of 2007 and 2008.
- Household consumption of durable and non-durable goods increased to £24.4bn in 2008 Q1 in spite of the squeeze on liquidity.
- The savings ratio fell to 1.1% in early 2008 – the lowest it has been in the last ten years. This came as a result of a sharp decline in gross savings between the first quarters of 2007 and 2008.

Labour Market – Tables 15-22

- The UK workforce grew by around 40,000 jobs between the final quarter of 2007 and the first quarter of 2008. Around 11,000 jobs were lost in the manufacturing sector but this was offset by a gain of around 19,000 jobs in the banking, finance and insurance sector.
- In 2008 Q1, employment remained strong at 79.1% of the working age population with only the South East of England recording a higher rate (79.5%). In the same period, the unemployment rate was the lowest of all the UK regions at 3.6%.
- The annual claimant count rate was the lowest in 2007, as was the monthly rate (May 2008).

List of Tables

Economic Performance

- Table 1a: Summary Indicators (£m)
- Table 1b: Summary Indicators – % Change
- Table 2a: GDP and GVA by Industry of Output (2003=100)
- Table 2b: GDP and GVA by Industry of Output - % Change
- Table 3a: GDP and GVA by Industry Output (2003=100)
- Table 3b: GDP and GVA by Industry Output – % Change
- Table 4: GVA by Region, current prices (£m)
- Table 5: GVA per Head by Region, current prices (£)
- Table 6: Balance of Payments (£m)
- Table 7: Inflation Rates – Annual and Quarterly % Change
- Table 8: Selected UK Financial Data
- Table 9: Exchange Rates of Selected Major Currencies
- Table 10: Retail Sales Index
- Table 11: Household Consumption Expenditure (£m)
- Table 12: Household Disposable Income & Gross Savings
- Table 13: Regional Standardised Index of House Prices (1983=100)
- Table 14: Consensus Forecasts

Labour Market

- Table 15: UK Workforce Jobs by Industry ('000s and % Change)
- Table 16: Industry Share of UK Workforce Jobs (%)
- Table 17: Employment Rate (%)
- Table 18: Unemployment Rate (%)
- Table 19: Monthly UK Claimant Count Rate (%)
- Table 20: Monthly Claimant Count by Region (%)
- Table 21: Annual Claimant Count by Region
- Table 22: Average Earnings Index (2000=100)
- Table 23: Average Weekly Earnings of Full-Time Employees (£)
- Table 24: Annual Growth in Average Weekly Earnings (%)
- Table 25: Average Weekly Earnings for Male and Female Full-Time Employees (£)

List of Charts

- Chart 1: Change in GVA and GDP by Industry Output
- Chart 2: Regional GVA 2001-2006, current prices (£bn)
- Chart 3: UK Trade Balance (£bn)
- Chart 4: Household Savings Ratio (%)
- Chart 5: Halifax House Price Index (1983=100)
- Chart 6: Industry Share of UK Workforce Jobs

Economic Performance

¹ The headline regional GVA series for this publication have been calculated using a five-period moving average.

² Estimates of regional GVA in this table are on a residence basis, where the income of commuters is allocated to where they live rather than their place of work.

³ Provisional

⁴ Excluding Extra-Region and statistical discrepancy. The GDP for Extra-Region includes the compensation of employees and gross operating surplus which cannot be assigned to regions.

¹ The headline regional GVA series for this publication have been calculated using a five-period moving average.

² Estimates of regional GVA in this table are on a residence basis, where the income of commuters is allocated to where they live rather than their place of work.

³ Provisional

⁴ Excluding Extra-Region and statistical discrepancy. The GDP for Extra-Region includes the compensation of employees and gross operating surplus which cannot be assigned to regions.
